

Aquahol Injection Inc

SOS Co2 Solutions Inc. Co2 FIRST SOLUTION:

To replace all CATALYTIC CONVERTERS WORLDWIDE with our H2O Injection KITS because the CATALYTIC CONVERTER is CREATING Co2 by BURNING the emissions of HYDRO CARBONS and CARBON MONOXIDE. Co2 was not a problem when the CATALYTIC CONVERTER was made into a original equipment Manufacturers (OEM) LAW!

Be aware that our patented H2O Injection KITS originally developed for the U.S. FIGHTER PLANE MUSTANG P51 during World War II, by Dr. Norman Wagg of ROLLS-ROYCE and helped win the AIR War with H2O Injection creating STEAM HYDROGEN & OXYGEN. Water EXPANDS 2000 TIMES in the COMBUSTION CHAMBER. It also dissociate the atoms of hydrogen and oxygen in a process called thermosplitting, therefore activating them to become catalyst in the clean combustion of the fuel.

It was later adapted to the RACING INDUSTRY for POWER. In a demonstration Dr Waag drove a car equipped with thermocoupling thermometers adapted to each combustion chambers and it was shown that water injection reduced the temperature some 300 degrees under load, enough to cancel the NOx.

Our innovation is adjusting the engine COMBUSTION to operate on MEAN LEAN, which is why we received USA NEWS for DOUBLING the FUEL MILEAGE on a Florida Hollywood POLICE CAR with water and alcohol in 1979 and WON the BEST ECOLOGICAL PATENT PRIZE by the International Inventors Foundation in California in 1991, even against the ELECTRIC CARS. Judges concluded that we were more SUSTAINABLE because the majority of the world has USED CARS and TRUCKS and poor Countries cannot afford to buy any NEW CARS @ \$35,000 to \$85,000+ versus our kit @ \$500. See attached tech attachments & our demonstration & testimonial video on our site called Cat_Conv_clip.
